LEVEL: 1

CREDITS: 5.0
ENROLLED STUDENTS 22/23: 298

RISK EXPOSURE TO LARGE LANGUAGE MODELS ESTIMATE:

Exposure Estimate : 1.45 - Low

Low means that there is a low level of at-home
or blended assessments, which we designated as
little risk of significant LLM-facilitated cheating in this module.

1.45

The Exposure Estimate was calculated by taking the assessments as listed on the UCD module page (Scan QR Code to see). Assessments were designated as either "At Home", "In Person" or "Blended" and then mapped to a numeric exposure rating, between 0 ("In Person") and 5 ("At Home"), based on the level of invigilation. Individual assessments exposure ratings were calculated based on their percentage of the final grade and summed to get the overall module rating.
 This is just an estimation of exposure, and may not be accurate. Discretion is advised

Assessment Type	% of Final Grade	Exposure Estimate
Examination	65	0.0
Lab Report	10	0.2
Continuous Assessment	25	1.25
